

# Housing Affordability in Carlton County

May 2009

**Minnesota Housing Partnership**

Homes for all.

Housing is considered affordable if it consumes less than 30% of a household's gross income. At higher levels, families must choose between housing and other basic needs and will struggle to weather financial setbacks. For 2009, housing costs continue to consume a large portion of families' income, with substantial unemployment threatening Minnesotans.
