

Simple Directions for Finding the Legislative Districts of an Address

(i.e. State & Congressional Elected Officials)

June 3, 2010

1. Go to: <http://www.leg.state.mn.us/>
2. In the middle section of the page at the bottom, type the address in the field provided under "Who Represents Me?" You can also enter partial addresses using just city and state.
3. It will direct you to a page with a list of the legislators representing the address, indicated by a red star ★, on a map. *NOTE: If you only entered city and state, some legislators representing that area may not be listed. This is especially true for major urban areas.*
4. If you do not have a specific street address, click inside the map to move the red star ★ on to the approximate area you need district information for.
