Homes for All in Norman County

RENTS HIGH, EARNINGS LIMITED

In order to afford rent and utilities for a safe, modest two-bedroom apartment at the fair market monthly rent of $583, Norman County workers would need to earn $11.21 per hour, 40 hours per week, all year long. The typical renter in the county, however, earns the equivalent of $8.82. At the minimum wage of $7.25 per hour, a worker must work 1.5 full time jobs to afford this rent.²

In Norman County, about 164 owner and 97 renter households pay at least half of their income for housing—a level considered severely unaffordable.¹

When housing is unaffordable, families are forced to choose between paying for housing and other needs, such as food or medicine.

CONstrained REntal OPTIONS

Growing demand plus a limited supply of rental housing is leading to higher rents and limited choice in many areas. The foreclosure crisis has turned scores of former homeowners into renters, and much of the rental stock is aging and not matched well to the needs of renters. Meanwhile, construction of multi-family properties statewide reached a 50-year low in 2006-2010.⁵

Where a shortage of rental homes exists, the burden is heaviest for the lowest-income renters. In Norman County, for every 100 extremely low-income renters there are 89 units that are affordable and available.⁶

In most Minnesota counties, renter incomes have fallen. According to the most recent data available, real renter incomes have fallen by 9% in Norman County since 1999. The median income for renter households is now $24,907.⁴
Children are especially vulnerable to the impacts of unstable, unaffordable housing, inadequate home heating and cooling, and a family budget squeezed between housing and food. In the worst cases, normal growth and development are stunted, and school performance suffers.

Homelessness in Minnesota
- On a single day in 2009, 393 people were known to be homeless in the Northwest Region, including 235 children and youth through age 21.\(^\text{13}\)
