Home is the foundation in

Chisago County

As Minnesota’s economy grows stronger, access to safe and affordable homes builds the foundation for living, working, and learning in all communities. Yet even working Minnesotans often lack good housing options, and aging homes create health and energy concerns.

In Chisago County, there are about 16,632 owner and 2,838 renter households.\(^1\) More than 17% of homes are at least 50 years old.\(^2\)

For 36% of owners and 56% of renters in Chisago County, housing consumes 30% or more of their household income.\(^3\) This can mean inadequate spending on other basic needs like food and medicine. Saving for education or emergencies often becomes impossible, especially for lowest-income households.

RENTER INCOMES LAG BEHIND RENTS

In Chisago County, 15% of households are renters.\(^4\) In most Minnesota counties, renter incomes have fallen as rents have risen. According to recent data for Chisago County, real renter incomes have fallen by 17%, while rents have risen by 18% since 2000.\(^5\)

There are now 35 units affordable and available for every 100 extremely low-income renters in Chisago County.\(^6\) The county ranks 75 out of the state’s 87 counties for the most units affordable and available to this income group.

RENTAL CHOICE KEY, BUT OPTIONS LIMITED

For many, renting makes sense. Young people starting out are often saddled with student debt. Seniors may not be able to afford or manage owning a home. Many do not have the savings or credit to qualify for mortgages. Workers relocating for jobs also need rental housing.

A safe, modest two-bedroom apartment costs $946 per month in Chisago County.\(^7\) At the median renter household income of $37,840, a family could affordably spend $732 per month on rent.\(^8\) By definition, half of the county’s renters earn less than this median, and would need less expensive housing.

At $8.00 per hour, the state minimum wage for 2014, an earner must work 91 hours per week\(^9\) to afford the $946 rent for a modest two-bedroom apartment in this county.
Unaffordable housing and homelessness affect people of all ages in Minnesota.

An estimated 14,000 Minnesotans were homeless on a given night in 2012. Homelessness increased 32% statewide from 2006 to 2012.18

On that 2012 night, 605 people were known to be homeless in the Central Region including:
- 171 children with their parents.
- 83 youth through age 21 living on their own.
- 39 seniors aged 55+.19

Without stable housing, children face higher barriers to success in schools.

About half of the people experiencing homelessness in Minnesota are 21 or under.20 Homelessness can cause delays in growth and development, as well as problems in school. Housing subsidies have been linked with better nutrition and school success for poor children.

In 2012, 9% of children in Chisago County were living in poverty, up from 6% in 2002.21

Owning a home.

85% of households in Chisago County own a home. For white, non-Hispanic households, the county’s ownership rate is 86%, compared to 79% for households of color. As a state, Minnesota has the nation’s largest racial homeownership gap.13

- The median sales price for non-foreclosed homes is $178,900 in Chisago County, which is a real decrease of 29% since 2006.14
- From 2005-2013, there were 2,636 foreclosures in the county.15
- Statewide, 3.1% of primary mortgages were delinquent by 60+ days in early 2014, compared to an average of 1.7% from 1979 to 2004, before the foreclosure crisis.16

In Chisago County 12% of owner and 27% of renter households pay half or more of their income for housing, a situation known as “severe cost burden.”17

Housing needs among seniors are growing.

The number of households headed by seniors aged 65+ in Chisago County grew from 1,704 in 2000 to 3,910 in 2008-12.22 Currently, 699 are renter households. Statewide, 3 in 5 senior renters pay more than 30% of their income for housing.23 Seniors were also one of the fastest growing segments of the state’s homeless population between 2009 and 2012.24

Targeted investment can end homelessness.

Ending homelessness is possible with strategic public investment. For example, targeting housing and services to homeless veterans led to a 13% decline in homelessness for this group from 2009 to 2012 even as homelessness rose overall.25
