WHERE WE LIVE IMPACTS EVERYTHING: the jobs we can access, the education our children receive and the wellbeing of our growing senior population.

In Minnesota, no full-time employee should have to choose between paying his rent or filling his prescriptions. No working mother should have to cut back on food for her children to make the mortgage. But that's a daily reality for more than 580,000 Minnesota households who pay more than 30% of their income on housing and don’t have enough left over to make ends meet to cover basic necessities, like transportation and groceries.

The cost of housing is rising far faster than incomes and the number of cost-burdened households has risen by 65% since 2000. That now includes nearly 60% of senior renters and 1 in 5 homeowners. Without safe, stable affordable housing for all residents, Minnesota is sacrificing the productivity of its workforce, the achievement of its children and the vitality of its growing senior population.

RENTERS IN DISTRICT 37A 3,162 | 20% of all households

Across the state, renters are a growing segment of the Minnesota population, rising 26% from 2000 to 2016. But even workers employed full time, in some of the most common and growing jobs, don’t earn enough to afford even a small apartment. When households are cost burdened, it’s not just their families that pay the price: The Minnesota economy loses out on $1.4 billion in renters’ spending power each year.

Seniors and families can’t make ends meet

Without reliable shelter, productive work, progress at school and positive health outcomes are extremely difficult. Just a few decades ago, homelessness didn’t exist — and Minnesota has made strides in recent years, with a 9% reduction from 2012 to 2015. The Twin Cities Region has seen a similar decline but, on any given night, nearly 3,000 children and seniors have no place to call home.
