CD3 WAGES: Housing remains a challenge even for Minnesotans who are fully employed. The median earnings for most of the top in-demand and high-growth jobs in CD3 do not cover housing costs at an affordable level. Those working at the median wage – and especially those earning the minimum wage – cannot afford a two-bedroom apartment or the mortgage for a median price home.

In Minnesota, there is critical need for housing particularly for extremely low-income renters, or renter households that earn at or under 30% of area median income (AMI).

Racial disparities in Minnesota are among the worst in the nation. While 77 percent of all white households own their home, only 44 percent of BIPOC households do.
