

2017 County Housing Profile

Marshall County

4,072 households | Northwest region

Access to safe, affordable homes builds a strong foundation for families and communities. But too many Minnesotans lack good housing options.

Contrary to the state trend, rent and income are rising at the same rate – and even the median-income renter still can afford the rent on a fair market two-bedroom apartment.

Income for families who own their homes is not rising nearly as quickly as home values, making it more difficult for families to purchase and own a home.

WAGES: Housing remains a challenge even for workers who are fully employed. The median earnings for most of the top in-demand and high-growth jobs do not cover housing costs at an affordable level. Those working at the median wage – and especially those earning the minimum wage – cannot afford a two-bedroom apartment or the mortgage for a median-value home.

HOMELESSNESS: Across the state, homelessness has declined since 2012, but too many families, seniors and children in the Northwest region are still suffering the devastating consequences of having no place to call home.

HOUSING STOCK: While a significant portion of the rental and owner-occupied housing is aging (built before 1960), new construction is not keeping up with demand. Of particular concern is the gap between the number of available units for extremely low income households – and the number of people who need them.
